## Invitation

Dear Sir/Madam,  
We have a pleasure in cordially inviting you to participate in National Seminar on  
“ **CHEMICAL HAZARD AND ENVIRONMENT**”

Organized by- Department of Chemistry

*Everything is made of chemicals. Many of the changes we observe in the world around we see that caused by chemical reactions. Chemistry is very important because it helps us to know the composition, structure & changes of matter. All the matters are made up of chemistry. In our everyday life various chemical are being used in various form. We use chemicals every day and perform chemical reactions without thinking much about them. Chemistry is important because everything we do is chemistry! Even our body is made of chemicals. Chemical reactions occur when we breathe, eat or do any other activity Chemistry is at the heart of environmental issues. What makes one chemical a nutrient and another chemical a pollutant?*

*Chemical hazards are substances that can cause harm or damage to the body, property or the environment. Chemical hazards can be either natural or human made .it causes degradation in ecosystem.*

*Environmental issue has existed for centuries but only started to be significant following the industrial revolution. In this seminar we are going to share different thoughts on the subject. It will be knowledgeable for scientist, academicians, engineers, doctors as well as chemists, industrialist, economists and social scientists.*
